### **Dimensions and Weight**

Temporary Fence Panels Size: L3064 x H2000mm

Frame: 32 x 2.0mm

Out Steel: Diameter 32mm \* 2pcs

Center Steel: Diameter 2.5mm

Mesh Spec: 55mm \* 55mm

2.1 metres X 2.0 metres

Temporary Fence Base: Plastic box inside cement

Advantage:

**Quick and easy to install** and can be easily relocated

**Protects** your valuable assets and protects you against Public Liability claims

Panel size means that only one panel needs removing for **vehicular and machinery access**

Hinged gate systems can also be used to enable vehicular and machinery access.

Standard panels **include barbed wire** as extra security

Panel **stabilisers** used to ensure sturdy fences on long runs or wind prone areas

Concrete blocks allow for **undulating sites** and include front or central locating slots

A new bracing system is also available that can be attached to the panel to further ensure the integrity of the fence system in areas prone for high wind.
